#### **Article III-152 (new)**

1.            In establishing an internal market and with regard for the need to preserve and improve the environment, Union policy on energy shall aim to:

- (a)            ~~ensure~~ **establish prerequisites for** the functioning of the energy market, **and**
- ~~(b)            ensure security of energy supply in the Union, and~~
- (eb)**        promote energy efficiency and saving and the development of new and renewable forms of energy.

2.            The measures necessary to achieve the objectives in paragraph 1 shall be enacted in a European law or framework law. It shall be adopted after consultation of the Committee of the Regions and the Economic and Social Committee.

The law or framework law shall not affect a Member State's choice between different energy sources and the general structure of its energy supply. Such measures shall be adopted in accordance with Article [III-125(2)(c) (ex 175)(2)(c))].

#### **Explanation (if any) :**

*In principle we can accept the new legal basis for energy. However it should be made clear that questions relating to a Members State's choice between energy sources and the general structure of its energy supply should be excluded from the application of this article. For that reason the paragraph 1 (b) should be deleted and the language in the paragraph 1 (a) modified accordingly.*
